

Exceptional Child/Early Childhood – Position Statement for Exceptional Child Preschool

Tennessee PTA supports a cap on the number of students per classroom (15) and urges appropriate funding to support the continuation of one certified teacher and two teacher assistants per classroom.

Rationale: Many children that are referred through the Early Intervention Services need the one-on-one intervention to meet their needs and to be successful. When more programs are in place, with fewer students per class, many of these students become successful and move to a regular education program.
